

BROOK INTERNATIONAL

&

L & M IMAGING SYSTEMS

Brook International would like to congratulate Tim Clough and his team at L&M Imaging Systems on the recent announcement that they have been appointed exclusive distributors for the Lüscher – Tschudi range of wide format digital textile printing machines in the UK.

L&M based in Hebden Bridge will be supplying both the T-Rex 320 II which can print up to 230sqm/hr and the Raptor which prints up to 140sqm/hr. They will be complimented by the Terminator 320 roll to roll fixation unit.

These units allow use of roll widths up to 3.2 metres using eco-friendly water based, dispersed dye, reactive and pigment based inks printing in 4-8 colours.

Brook International, based in Yorkshire, have been manufacturing and supplying a comprehensive range of textiles for nearly 120 years and to the wide format print market for 20 years.

Brook International and L&M will be working together to provide a complete package of equipment and textiles. This will involve factory profiling on a range of Brook International digital textiles that will cater for all applications from flags and banners to lightboxes for retail applications.

These profiles will be readily available to all owners of Lüscher – Tschudi printers on request.
