

# TOT Shirts Buy SAATI Laser To Screen

30<sup>th</sup> September 2024

## SAATI – LTS6080

Fitted with 96 x 120mW lasers the SAATI LTS6080 is capable of imaging high quality screens fast. During extensive testing TOT Shirts were able to expose each screen in as little as 88 seconds with consistent accurate registration on press.

Ease of use, high build quality, reliability, low power consumption (just 350w), small footprint, and the ability to image almost all emulsions gave TOT Shirts the confidence that the LTS6080 fulfilled all their needs.

Supplied with Xitron Navigator Workflow and Harlequin RIP the software allows TOT Shirts to accurately calibrate to press either with conventional or HDS (stochastic) screening.

L&M Imaging Systems have provided installation and training to an extremely high level, taking on board all TOT Shirts challenges and demands.

## About TOT Shirts
